

calendar::calendarView  
::getEventsForDay

calendar::weeklyCalendar  
View::getEventsForDay

calendar::day::getEvents

```
graph LR; A[calendar::calendarView::getEventsForDay] --> C[calendar::day::getEvents]; B[calendar::weeklyCalendarView::getEventsForDay] --> C;
```

The diagram illustrates a delegation pattern. Two methods, 'calendar::calendarView::getEventsForDay' and 'calendar::weeklyCalendarView::getEventsForDay', are shown on the left. Both have arrows pointing to a single method, 'calendar::day::getEvents', on the right. The target method is highlighted with a gray background, indicating it is the implementation being delegated to.
