

calendar::event::event

calendar::eventHoliday  
::eventHoliday

calendar::event::setEvDate

```
graph LR; A[calendar::event::event] --> C[calendar::event::setEvDate]; B[calendar::eventHoliday::eventHoliday] --> C;
```

The diagram illustrates a dependency or relationship between two source classes and a target method. On the left, there are two rectangular boxes. The top box contains the text 'calendar::event::event'. The bottom box contains the text 'calendar::eventHoliday' followed by '::eventHoliday' on a new line. On the right, there is a single rectangular box with a light gray fill and a black border, containing the text 'calendar::event::setEvDate'. Two blue arrows point from the right side of the left boxes to the left side of the right box. The arrow from the top box points to the top edge of the right box, and the arrow from the bottom box points to the middle edge of the right box.
